Need An Accountant Who Can Grow My Business

Providing solutions, not just numbers

Tel: 604-472-7776

Looking for a New Accountant What do you want from your accountant?

If you are in the market looking for an accountant, either you are not satisfied with your current accountant or do not currently have one. When you look for a new accountant, you need to ask “what do I want from them?” Do you just want to stay in compliance with CRA by filing your income tax returns, GST, PST, payroll, and reconciling your monthly books on time, or are you looking for a business advisor who also becomes a strategic business development advisor who coaches you throughout your business life cycle?

General Practitioners vs. Business Advisors:

General practitioners see the tax return as the end of the client process. They offer services such as bookkeeping, filing GST and PST return & monthly payroll service so you stay on compliance with CRA. They also offer some year-end tax planning advice when preparing your financial

statement and taxes.

On the other hand, a **business advisor** helps to grow your business and wealth and views a tax return as the start of the process. They will help you think strategically, come up

with new ideas and put them into plans to ultimately execute them by taking appropriate actions.

At CNC we recognize the fact that

Small business owners want not only compliance but also business growth, so ultimately when they will retire they can either sell their business for the right price and enjoy their

retirement or hand over the business operation to the next generation, their kids.

Business Advisors, What They Can Do For Me?

At CNC we can help you with:

- ◆ GROWTH - help you grow your revenue and wealth.
- ◆ PROFIT - help you to improve business bottom line i.e., the net profit.
- ◆ CASHFLOW - help you to understand the importance of cash-flow and how to improve it. They will put a strategic plan in place to avoid shortages which could cause disruption in your business operation.
- ◆ ASSET PROTECTION - An advisor can help you to design an effective business structure to protect your assets from creditors and minimize taxes.
- ◆ SUCCESSION PLANNING - help you create a strategic plan to build value in your business to make your business sellable or pass on to next generation and minimize taxes in the whole process.

Why you Choose CNC?

We strive to earn your trust and that means we need to understand what makes your business *successful* so you can materialize potential opportunities. We provide you solutions, not just numbers. At CNC you are not just a customer or a file number, you are a friend and we will go the extra mile to do what it takes for your satisfaction. We care about you and listen to your changing needs.

We are pro-active and not reactive. As pro-active accountants we believe we have the responsibility to help our clients build more efficient, profitable and valuable business, and we have identified some key areas that separate us from other accounting firms.

Stay in Compliance With CRA

We understand that compliance is utmost necessary to operate as a successful business and have a complete peace of mind. We at CNC offer full cycle

bookkeeping, payroll and bank reconciliation services. We will take off the workload from your shoulders so you can stay focused on your business and let us complete your books.

Improving Cash-Flow

The popular saying “Cash is King” is not wrong. Cash-flow is the net change in your company’s cash position from one period to another period. It is a key indicator of your business’ health. A business can’t survive for long if they have negative cash-flow. They ultimately will be out of business or have to rely on debt financing. We can lay out a plan to generate positive cash-flow and avoid debt financing.

Help Me To Understand Numbers

At CNC we provide solutions, not just numbers. Our goal is to put you on the business success path. We want you working on your business and we will provide you mission critical reports on a timely basis so you can make well in-

formed business decisions.

Improving Business Profit

A very popular phrase from the Jerry Maguire movie, “SHOW ME THE MONEY” is what all small business

owners expect from their accountants. We will prepare a strategic business plan tailored for your financial & business needs. By following those guidelines we will improve your profit and will make your business more successful. We want to be a partner in your success.

Changing Accountants

The decision to change your accountant can be a difficult one and it is understandable because you have been working with them for a number of years, and overtime, they have become like extended family members.

However, because the decision to change accountants is a business decision, you should not feel uncomfortable or obligated to stay with an accountant who you feel is no longer meeting your business needs and financial goals.
